About the College :

GIET School of Pharmacy was established in 2004 by Founder and Chairman Dr. K.V.V. Satyanarayana Raju, under Sri Koundinya Educational Society who is the pioneer in educational institutions of East Godavari District, Andhra Pradesh. The Institute is affiliated to Andhra University, approved by AICTE and recognized by PCI, New Delhi. GIET School of Pharmacy is one of few institutions in Andhra Pradesh approved by the National Assessment and Accreditation Council (NAAC), Bangalore, which illustrates its quality in academic. Considering the global focus on clinical orientation of the pharmacy profession, GIET School of Pharmacy was introduced the Doctor of Pharmacy (Pharm.D) course in 2004 with the approval from PCI.

Course offered

B. Pharm: The students those are interested in the medical field (except to become a doctor) can choose this course after the completion of class 12th can work in a range of industries related to the prescription, manufacture & provision of medicines. The duration of this course is 4 years.

Pharm.D: The Pharm.D course lasts six years in total, with two years of classroom instruction and one year of practical training. The only doctoral degree that can be pursued immediately after finishing the 10+2 exams. Furthermore, B. Pharm graduates can pursue a Pharm.D course by applying for a lateral entry program, i.e., Pharm.D course (Post Baccalaureate).

M. Pharm: A Master of Pharmacy degree holder is one pharmacy course that is structured in a way to provide entire technical, research, practical and theoretical knowledge of pharmacy including traditional and modern medicines. The degree is of great value because a person holding this degree is as knowledgeable as a medical practitioner with years of experience, in fact, way ahead of doctors by acquiring knowledge with experience of complete health care industry.

About the programme:

Drug design is the inventive process of finding new medications based on the knowledge of a biological target. In the most basic sense, drug design involves the design of molecules that are complementary in shape and charge to the molecular target with which they interact and bind.

Molecular modeling is the science of representing molecular structures numerically and simulating their behavior with the equations of quantum and classical physics. The drug designing softwares such as Insight II, Discovery Studio, Materials Studio, Accord, Prime and Jaguar are used for structure based drug designing and drug designing softwares such as Glide, Macro Model, Autodock and Argus lab are used for ligand based drug designing. Molecular modeling describes the generation, representation and/or manipulation of 3-D structure of chemical and biological molecules, along with determination of physicochemical properties that can help to interpret structure activity relationship (SAR) of the biological molecules.

ABOUT THE PROGRAMME

Research paper should tell a story of how you began your research, what you found, and how it advances your research field. It is important to structure your research paper so that editors and readers can easily find information. The widely adopted structure that research papers mostly follow is the IMRaD format. IMRaD stands for Introduction, Methods, Results, and Discussion. Additional requirements from journals include an abstract, keywords, acknowledgements, and references. This format helps scientists to tell their story in an organized manner. Authors often find it easier to write the IMRaD sections in a different order. **IMPORTANCE OF PUBLICATION:**

- Creation of research facilities
- Innovation
- Impact on Society and Community Development
- Increase Standard of Living
- Supports research and development.
